Title: Need to repair Dombivalli Post Office building in Vishnunagar, Maharashtra.

DR. SHRIKANT EKNATH SHINDE (KALYAN): I would like to raise the issue of post office buildings that are dilapidated. I would like to bring to the notice about the Dombivali post office in my constituency where thousands of citizens come for their work. If these buildings are declared dangerous, the Department should immediately undertake repairs so that the lives are not put at risk.

I am talking about Vishnunagar post office in my constituency which has been very weak. Around 60-70 postal staff work here who are under constant threat of a collapse. If the building collapses it will be a mishap that could have been averted. People have been complaining about the building for along time. Postal Department does not have time to listen. Now, the Postal Department has been shifted to the east, which means that people have to spend at least half an hour to reach the post office, and the existing post office in the east is already crowded. Most affected population are the senior citizens and the pensioners. The Commissioner has agreed to make a suitable place in the Dombivali West itself. Hence, I would request the Department of Posts in the Dombivali West with suitable accommodation and repair the building as soon as possible.
